HORSE SHOW RINGS

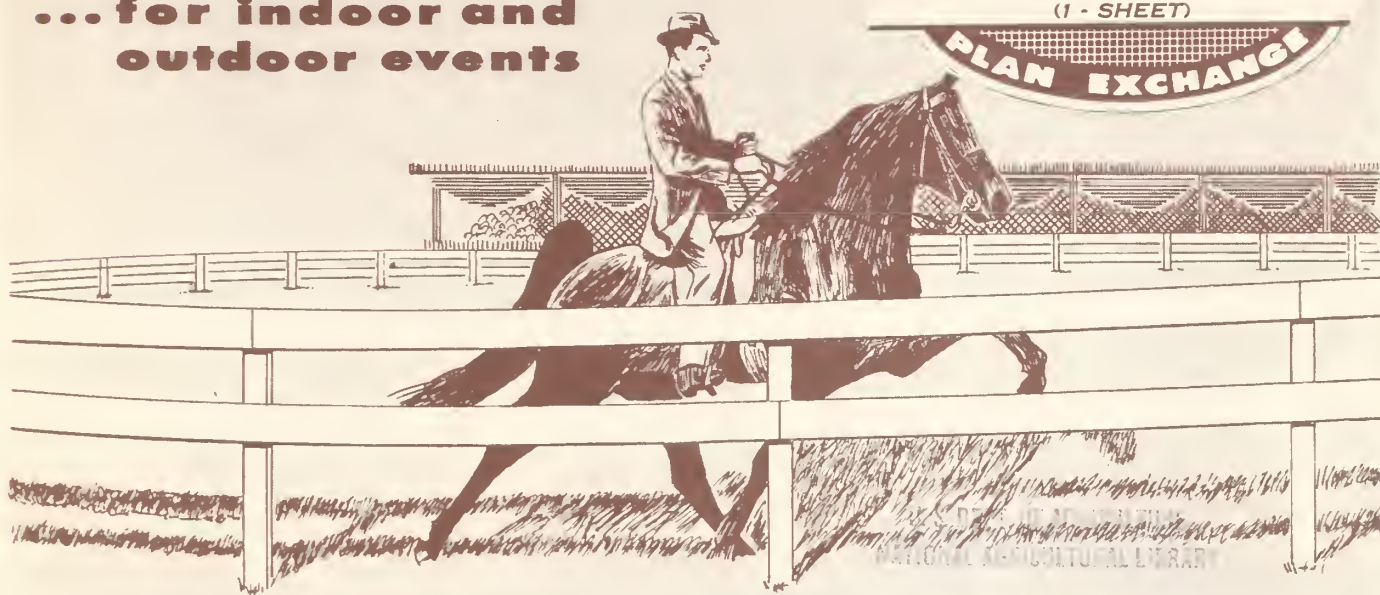

...for indoor and outdoor events

COOPERATIVE
FARM BUILDING

Plan No. 6015

(1 - SHEET)

PLAN EXCHANGE

OUTDOOR RING - 120'X240'

The indoor and outdoor show rings shown on this plan were developed at the Virginia Polytechnic Institute.

Today, there is a growing interest and demand for riding horses. Raising this type horse has now become a profitable business.

The show ring is considered an ideal place to exhibit horses for performance, presence, quality, manners, and all-around brilliance and conformation and for gait, such as a walk, trot, and canter. Thereby, the prospective buyer is encouraged to make a purchase, and, thus, the farmer makes a worthwhile sale.

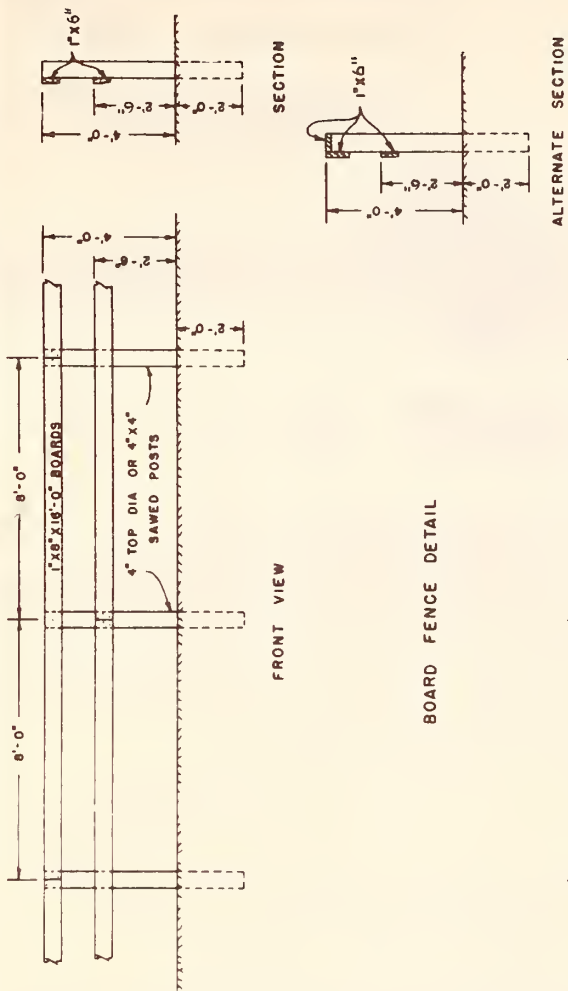

The construction of the show rings is fairly simple. Use sturdy material. For longer life for the board,

natural-rail, and movable fence, treat the posts with a nontoxic preservative and brush a coat of it on the rails. Use noncorrosive fastenings throughout.

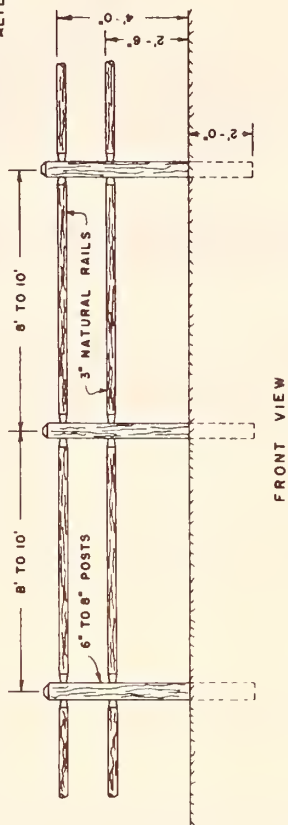

A section of movable fence, a gate, or removable rails can be used for the entrance to the ring.

The sizes indicated were recommended by the National Horse Show Association.

Anyone entering the horse business will need to know more about equipment to be used for training horses for field events. This equipment is featured in Plan Exchange No. 6014, which is available from the same source as this plan. It shows the construction details of various types of jumps and related equipment.

HORSE SHOW RINGS

SIZES RECOMMENDED BY THE NATIONAL HORSE SHOW ASSOCIATION

A large-scale drawing of the show rings may be obtained from the Extension agricultural engineer at your State university. There may be a small charge to cover cost of printing.

If you do not know whom to contact in your State, send your request to Agricultural Engineer, Federal Extension Service, U.S. Department of Agriculture, Washington, D.C. 20250. He will forward your request to the correct university.
